

# CYBERHOUND CLASSROOM CONTROL

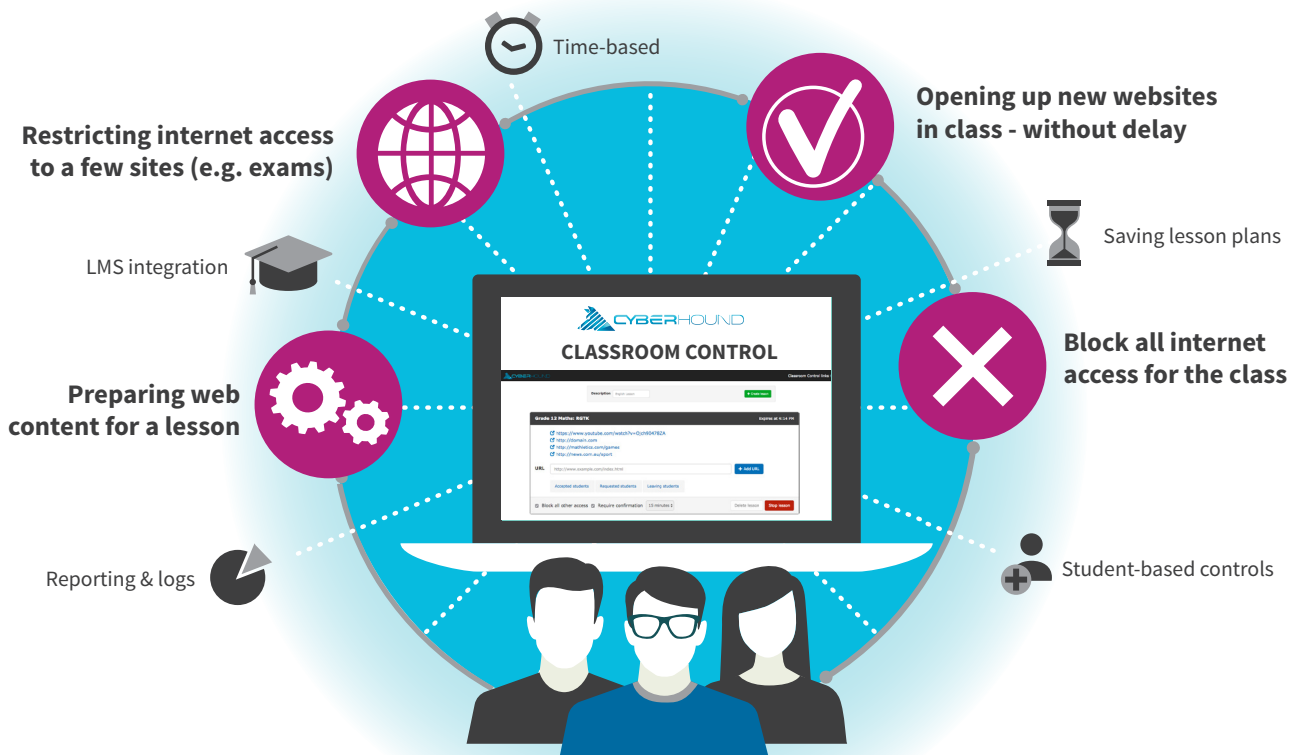

## GIVING TEACHERS FLEXIBILITY AND CONTROL IN THE CLASSROOM

Classroom Control is a unique capability from CyberHound that helps teachers maximise their productivity in class and gives them reliable access to digital content.

Teachers are able to plan their lessons in advance for even greater efficiency in class. CyberHound has integrated this feature with leading Learning Management System solutions so that teachers can manage Classroom Control from within the LMS interface.

Classroom Control provides teachers with complete control over the internet in their class.

### Classroom Control – helping teachers focus on teaching not IT

*“We have used the CyberHound service for many years and we value their ongoing innovation and strong customer service focus. A recent example of their service was in helping us gain greater value from their Classroom Control feature. This is a valuable tool for us that will save time and improve teaching efficiency and outcomes. CyberHound’s Classroom Control enables teachers to have independent control over the use of the internet in their classes. Ultimately this means that teachers can use all available and appropriate digital learning content in class and not have any distractions or frustrations in managing internet access.*

*The greatest development for us is the integration that CyberHound have created with Schoolbox LMS. This functionality enables teachers to now plan lessons through Schoolbox and have this seamlessly integrate with CyberHound’s filtering policies to enable content to be available as needed. We applaud CyberHound on providing us with this and for helping us all the way.*

David Young, Strathcona Baptist Girls Grammar School

# CYBERHOUND CLASSROOM CONTROL

## Granular controls in the hands of the teacher

CyberHound's reliable and accurate web filtering technology ensures that, ordinarily, any content required in a classroom is available without any changes. If a teacher requires an exception it can be accessed in the classroom without the need for IT support. This might be to access some specialist content that may not be available to other students – for example a sports video in a PE class or a shopping site for a design lesson. For security and cybersafety purposes, sites with malware or inappropriate content, as specified by the school, cannot be accessed.

Classroom Control is integrated with many leading LMS platforms including SEQTA, Schoolbox, Daymap, Canvas, Blackboard, Moodle, Schoology and Desire2learn.

## Key features:

- Block access for the class
- Easy access to specialist content (in class)
- Lock down access to only key content
- Student-based controls
- Time-based controls
- Fully integrated with leading LMS

## Key benefits:

- Teachers create digital lessons without IT overhead
- Ease of use for teachers
- Ease of access to online content
- Ensures student focus
- Assists with online exams

CyberHound provides full training and collateral for teaching staff to help them get the maximum benefit from the service.

*When evaluating new solutions we came across CyberHound and assessed that it was a fraction of the cost of our existing solution considerably more tailored to our education requirements and performed the tasks that we needed seamlessly.*

Peter Chang, American School of Dubai
