# CYBERHOUND CLEARVIEW

OFFERING ADVANCED BEHAVIOURAL ANALYTICS FOR SCHOOLS

ClearView is a unique capability that enables improved cybersafety for schools through the actionable intelligence it provides to school leaders.

ClearView seamlessly scans and analyses internet traffic to identify behaviour that could indicate a student behavioural issue. The unique platform analyses data in real-time and provides behavioural analysis to student welfare staff and school executives. This ensures that timely support can be provided to students in need and inappropriate activity can be managed immediately, before it escalates.

The ClearView platform includes best-practice policies that have been created over many years in consultation with schools, in-house experts and professional specialists. These policies can be customised to suit any school's individual needs.

ClearView is used by many leading schools across the world and complements other cybersafety initiatives that schools utilise.

> *I strongly endorse the CyberHound Appliance pattern matching solution to all schools. We have already seen extraordinary benefits in our schools – including the prevention of suicides and the protection of our students from predators.*
>
> **Lynne Doneley, Associated Christian Schools**

CYBERHOUND CLEARVIEW

Default Policy Framework

ClearView is provided with a best-practice policy framework that can be added to with custom rules or a specific "watch list" to monitor a particular group of students who are deemed at risk or require closer supervision. ClearView also allows easy updating to capture new language or trends specific to a school's environment for total flexibility.

The default policy framework includes:

- Self-harm
- Eating disorders
- Radicalisation

- Aggression
- Extreme profanity
- Drugs

- Religious slurs & Racism
- Predatory behaviour

- LGBTI slurs
- Bomb-making
- Mild profanity

When evaluating new solutions we came across CyberHound and assessed that it was a fraction of the cost of our existing solution considerably more tailored to our education requirements and performed the tasks that we needed seamlessly.

Peter Chang, American School of Dubai

Powerful XGEN Reporting Platform

The XGEN Reporting Platform is intuitive, efficient and accurate. It provides timely actionable intelligence in a modern interface that enables school leaders to easily analyse and identify any at risk behaviour.

See exactly what YouTube video's students are watching and schedule and deliver reports on time, every time.

The platform can be customized by role, allowing data results to be filtered and assigned to specific areas of responsibility.

We have a very firm policy on bullying and we are delighted to have the ability to pick this up and even identify the victims of cyber bullying – both inside and outside the school.

Greg Mattiske, Suncoast Christian School
