

PENTANA SOLUTIONS MANAGED SECURITY SERVICE

A Managed Security Solution for Automotive Dealers that Delivers a Rapid Return on Investment.

The solution has been designed for Automotive Dealers and is used by hundreds of Dealers across Australia. It offers a unique suite of productivity, risk management and security features that are packaged up into an easy to use solution that can be managed by your own staff or Pentana and CyberHound experts.

The Pentana Managed Security Appliance is an all-in-one solution that offers the following benefits:

- Protection against network vulnerabilities & security threats
- Protection against costly and time-consuming ransomware threats
- Reduction in administration costs for IT staff
- Enhanced productivity for staff through reliable internet access
- Transparency and controls for management over staff internet use
- Protection against illegal and costly internet activity on the dealer network – e.g. downloading movies
- Protection against costly and time-consuming malware from social media sites and other malware sources
- Customised and easy to use reports for Dealer Principals with Actionable Intelligence on internet usage

The solution offers a unique feature for Dealers, called ClearView, to manage reputational and legal risks. This helps prevent issues such as workplace bullying, harassment and discrimination while alerting the Dealer Principal or other executives to issues of inappropriate communications or use.

With so much value residing in customer databases and other intellectual property, the solution also offers the ability to secure this data and prevent it being shared electronically – even against accidental disclosure.

It pays for itself in the following ways:

- Improving staff productivity – just gaining an extra 15 minutes of productivity per person every day is worth \$100k pa in a dealership of 50 staff
- Improved efficiency delivers similar financial benefits – from more reliable and faster internet access and reduced IT administration
- Reduced IT administration and support
- Time and cost saved from dealing with malware attacks
- Enhanced internet performance from existing internet links – potentially delaying expensive upgrades

✓	SECURITY
✓	NETWORK CONTROLS
✓	MALWARE PROTECTION
✓	RANSOMWARE PROTECTION
✓	STAFF PRODUCTIVITY TOOLS
✓	INTERNET PERFORMANCE GAINS
✓	REDUCED IT ADMINISTRATION
✓	COSTS SAVINGS
✓	REPORTING

The solution also helps protect Automotive Dealers from IT failures. The solution can be easily set up to manage multiple internet links to ensure that if one link fails, the Dealership remains online. Other Disaster Recovery features are included to ensure continuity of network and internet services.

For Dealers with multiple sites, there are further benefits in managing policies across sites and setting up secure communication links.

The solution is backed up by a full support and managed service and has won praise from customers for its ease of use and cost saving benefits.

“ The Pentana Solutions Managed Security Service provides vital protection from internet-based threats. As a fully managed service it means our customers save time and money.

Pentana Solutions**

The **Productivity Benefits Calculator** shows the benefits from time saving efficiencies created by the solution. This shows the significant value and return on investment that can be gained by helping staff improve their productivity and efficiency.

Productivity Benefits Calculator (annual costs efficiency):

STAFF #	10 MINS/DAY	20 MINS/DAY	30 MINS/DAY
10	\$14k	\$28k	\$42k
25	\$36k	\$72k	\$108k
50	\$72k	\$144k	\$216k
100	\$104k	\$208k	\$432k
200	\$208k	\$516k	\$864k

Based on average salary \$70k p.a.

Time saving from:

- No internet distractions
- Reliable internet services
- Ease of access to Wi-Fi on any device
- Social media controls
- Control of malicious content
- IT administration

We have worked with CyberHound for over 10 years and believe they offer the best value and most innovative solution for our customers.

Rick Pinto, Executive - Pentana Solutions

About CyberHound

CyberHound provides organisations with the ability to optimise and manage their internet and network services. We help companies secure their networks and we provide unique tools to protect organisations from a wide range of online threats.

Over the last 17 years, CyberHound has developed the most comprehensive internet optimisation and cyber security solution for automotive dealers and our solution is now the benchmark for organisations in Australia and internationally.
