# Setting the Standard for International Schools in Cyber Security

CyberHound is the 'Trusted Solution' for International Schools

It's no accident that 350 schools around the world trust CyberHound to protect their online environments, and it's not just because of our Next Generation Firewall or Granular Content Filtering.

CyberHound is an Australian-based cybersafety and cyber security company that provides schools with the ability to get ahead and stay ahead – identifying threats before they escalate, managing costs before they balloon and enabling better decision-making.

With over 17 years of ongoing innovation, we offer unique technology for K-12 schools to help address issues such as cyberbullying, self-harm and youth radicalisation.

INTERNET PERFORMANCE
Utilisation of eLearning in the classroom

FUTURE PROOFING
ICT costs risks over the next 3 years

CYBERSAFETY
Student and staff wellbeing

DIGITAL CITIZENSHIP
Responsible internet use

RISK MITIGATION
Identification and management of risks

CyberHound's Digital Risk Management Assessment

With our Sixth Sense Technology (6ST) we're able to provide our customers with 'Actionable Intelligence' to enhance visibility and insight into students' internet and network-based activity.

It is our goal to empower schools through the right security and network transparency. We aim to assist schools to enable eLearning in a safe online environment whilst alerting and reporting on 'red flags'.

Being a part of the BigAir Group means we can package our online security solutions in with internet services, thus providing significant savings for our customers.
